**Stay warm. Stay smart.**

The efficiency of any furnace is measured in AFUE, or Annual Fuel Utilization Efficiency. AFUE measures how much of the fuel you pay for is actually turned into usable heat. Because of their smart design, Trane 80 oil furnaces have an AFUE of up to 85, meaning up to 85% of your fuel is converted to heat. With that kind of efficiency, you can keep your home the way you like it while still using energy wisely.

**A new Trane furnace with a higher AFUE can save you money every month.**

If you have an older furnace, you may be spending more on fuel than you need to. Compare the AFUE of your old system to the AFUE of a new Trane furnace and see how much you can potentially save. For example, upgrading from an AFUE of 60 to an AFUE of 85 can save up to \$29 of every \$100 spent on fuel.

Calculate your savings for every \$100 spent on energy.

AFUE Rating of Existing System	AFUE of New System	
	85%	80%
50%	\$41	\$37
55%	\$35	\$31
60%	\$29	\$25
65%	\$23	\$19
70%	\$18	\$12
75%	\$11	\$6

- 1 Heat Exchanger  
Made of rugged, 13-gauge steel, the heat exchanger is where the cool air of your home is warmed by the furnace. Trane builds them to last.
- 2 Combustion Chamber  
Designed for extremely quiet operation, the ceramic fiber combustion chamber is where fuel is burned to generate heat.
- 3 Oil Burner  
The heart of the furnace. Time tested and proven Trane burners deliver long life while stretching every fuel dollar.
- 4 Variable-Speed Blower Motor With Comfort-R™  
Quieter and more efficient than conventional blowers, variable-speed Trane blowers deliver a more consistent, even flow of heat throughout your home to eliminate hot and cold spots. During the summer, Comfort-R™ humidity control regulates moisture levels for more energy-efficient comfort.
- 5 Insulated Cabinet And Blower Compartment  
Well-insulated cabinet greatly reduces energy loss and operating noise.
- 6 Durable Steel Cabinet  
Powder painted heavy gauge steel is strong and durable.
- 7 Cleanable Filter (Not Shown)  
This easily-cleaned filter helps maintain the superior performance of your Trane oil furnace. Included with most models.

### The various advantages of variable-speed.

Trane believes every component in our furnaces should deliver more. So rather than using a conventional blower in Trane XV80 oil furnaces, we took the remarkable step of adding a variable-speed blower.

During winter, powerful, flexible variable-speed blowers are not only quieter than standard blowers, they create a more even, steady flow of heat. So you have more consistent temperatures and no hot and cold spots

### Comfort-R™

During the summer, the Comfort-R feature of your XV80 furnace uses a slower airspeed at startup to let the coil cool down quickly, removing more humidity before air begins to circulate in your home. This reduces temperature variances and makes your air feel better, even at more energy-efficient settings.

### Configured to fit your home.

No matter what your size requirements, our 80 oil furnace family has an option that will fit your home perfectly. The short 41.5" vertically configured lowboy is perfect for low ceilings, while the 58" vertical highboy is ideal for basements, utility rooms or closets. Additionally, downflow models can be installed horizontally in crawl spaces or vertically in closets, basements, utility rooms and garages. Your independent Trane dealer will assist you in selecting the configuration that's best suited for your home.

### The flexibility and efficiency of Dual Fuel.

When you combine an efficient multi-stage Trane Standard oil furnace with a reliable, hardworking heat pump you create a Dual Fuel system with the flexibility to heat your home with either oil or electricity, based on whichever is most efficient at the time. So you're always using the most cost-effective fuel to stay comfortable. And energy smart.

### Take comfort in our warranties.

Trane is all about making you feel better, and that includes peace of mind. That's why every Trane oil furnace is built with premium materials, and backed by a robust, no-nonsense warranty. XV80 and XP80 furnaces include a lifetime limited

warranty on the heat exchanger and ten years on all other internal functional parts with registration within 60 days at [www.myfurnace.net](http://www.myfurnace.net). Your dealer can provide specific details on your system's warranty.
